

ACubed “Minion 15k” Diversified Program

Program Description

The ACubed 15k diversified program is an algorithmic swing and day trading program. It contains a portfolio of well diversified trading strategies across 6 different markets.

Each strategy has passed strict performance, robustness and stress-testing thresholds across diverse market regimes and can be switched on/off based on proprietary metrics and market conditions.

Strategies are regularly assessed. Any that are underperforming outside of acceptable baselines are paused and replaced if they don't recover in the expected timeframe. Only markets that exhibit specific conditions are traded.

Products Traded

Micro Crude Oil Futures Micro Gold Futures Micro Japanese Yen Futures
Micro Nasdaq 100 Futures Micro S&P 500 Futures Mini Soybeans Futures

Note: The number of markets being traded at any time can vary, depending on strategy and market conditions.
