

# ACubed “Rosie Cheeks 100k” Diversified Program

## Program Description

The ACubed 100k diversified program is an algorithmic swing and day trading program. It contains a portfolio of well diversified trading strategies across 14 potential markets.

Each strategy has passed strict performance, robustness and stress-testing thresholds across diverse market regimes and can be switched on/off based on proprietary metrics and market conditions.

Strategies are regularly assessed. Any that are underperforming outside of acceptable baselines are paused and replaced if they don't recover in the expected timeframe. Only markets that exhibit specific conditions are traded.
